

# Dust Control Contract of Understanding, 2026

The Municipality has changed the billing calculation, please read entirely.

**Grading:**

1. Dust Control sites will be graded and cared for as the road is a municipal asset. The staff will try their best to only grade the site when it is wet with heavy dew or rain, but this is not always an option and occasional dry grading is required.

**Application:**

1. Dust Suppressant is applied under Municipal guidelines, and the product is approved by the Council of the Rural Municipality of Keys No 303. No other suppressant shall be used or applied on the roads.
2. Stakes (yellow) are to be used for dust control and will be put out the week prior to delivery and removed immediately after application. Stakes will be available for pickup at the RM of Keys office in Canora as well as the Norquay and Canora shops, or any yellow stake you have available.
3. The stake locations are only a general indicator of where the dust control will be applied. Application may not begin or end exactly at the stake locations. No discounts will be given if the applied distance differs from the requested distance.
4. It is the owner's responsibility to have stakes in place for the application time.

**Cost:**

1. Billing will be determined by liters applied, NOT by distance.
2. The landowner has the option of regular application (1.5 liter/meter) or heavy application (2 liter/meter) to be applied. Default will be regular application.  
 1.5 liter/meter                       2 liter/meter
3. Dust control is subject to PST, the additional tax shall be added to the cost of the dust control.

**4. Interest charges will be applied to any invoices unpaid after 60 days of the billing date.**

Estimated feet of product: \_\_\_\_\_ (minimum 328 ft / 100 m)

Legal Location of application: \_\_\_\_\_

Please show where the dust control will be requested for application →
